

Before the First Shave Checklist

- Had a low-pressure conversation about shaving — no pressure to start.
- Asked about skin sensitivity and where she wants to shave.
- Chose a razor together.
- Picked up shaving cream or gel (not just soap).
- Picked up a gentle post-shave moisturizer.
- Talked through the basic technique before the first try.
- Let her do a dry run with the razor before using it with water.
- Agreed on whether she wants you nearby or to try it solo.
